INTRODUCTION

MEDKRAFT Orthodontics reflects the image of an impeccable source of finest quality orthodontic products to the practitioner's world over. Indeed, it resulted as a total team effort of skilled and enterprising individuals with an extensive experience in high class manufacturing techniques and distribution of value added orthodontic products to the orthodontists in a timely and effective manner.

Our customers are the most important KEY to our on-going success. Customer satisfaction is of utmost importance for us and ranked as the top priority for our team. Medkraft products are manufactured by hand picked high quality materials to ensure the optimum performance and effective results in clinical practice. Stringent quality control and testing system is implemented at our production facility to ensure the high quality output.

It is a memorable moment for us, where we present our newly designed orthodontic products catalog to our customers. Your valuable feed back helps us in building up better services and improves our standards day by day, which further strengthen our relationships.

All Products are FDA & CE registered

BRACKETS

Maxima Carrière SLB Self-Ligating Bracket

New

**Easily open and close slide
with a scaler or ligature director.**

FEATURES

- ♦ Change Wires Quickly with Smooth Slide Mechanism
- ♦ More Hygienic for Patients
- ♦ Anatomically Contoured
- ♦ Profile Similar to Conventional Mini-Twin
- ♦ Nickel-Free Bio-Compatible Material
- ♦ Metal Injection Molded
- ♦ MBT & Roth Prescription

Maxima Carrière SLB

Archwire Application Sequence

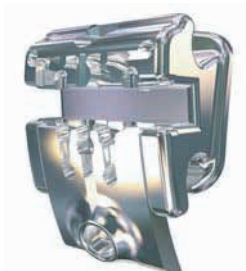

STEP 1 (LEVELING AND ALIGNING)						
Initial Archwires	Black-Ti S/E	Adv Therm	NiTi S/E	Niti Tri-Force	SS 8 Braided	
.012, .014, .016	x	x	x			
(Dimpled archwires or archwire stops recommended)						
Higher degree of malocclusion and lingual displacements = smaller wire diameter						
Optional wires to realize torque earlier in mild cases						
.014 x .025, .016 x .025		x	x			
.016 x .022, .017 x .025				x	x	

*Black Ti S/E=lowest friction

STEP 2 (PRE-MECHANICS)						
Intermediate Archwires		Adv Therm	NiTi S/E	Niti Tri-Force	SS 8 Braided	
.014 x .025, .016 x .022, .016 x .025		x	x			
.016 x .022, .017 x .025		x	x		x	
Optional wires for mild cases						
.017 x .025, .018 x .025,		x	x			
.016 x .022, .017 x .025, .018 x .025				x		

(MECHANICS) RETRACTION AND SPACE CLOSURE						
Anterior- Posterior Movement	Black-Ti S/E	NiTi S/E	NiTi RCS	Beta III Loop		
.018, .020	x	x	x			
Retraction Mushroom Looped Wires						
.016 x .022, .017 x .025, .019 x .025				x		
Beta III looped wires counteract bite closing during retraction ref: Dr. Uribe/Dr. Nanda JCO article Nov. 2003						
NiTi RCS to counteract Bite Closing during retraction						
INTRUSION/EXTRUSION (OPEN BITE OR DEEP BITE CORRECTION)						
Intrusion/Extrusion Long/Short			NiTi RCS		NiTi CTA	
.016 x .022, .017 x .025					x	
.016, .018, .020			x			
Intrusion Arches ref: Nanda JCO article Nov. 2003						
ADDITIONAL ANTERIOR TORQUE						
NiTi Torqued Wires 20 degrees						NiTi Torq'd
.016 x .022, .017 x .025, .019 x .025						x

STEP 3 (FINISHING/DETAILING)						
Finishing Phase					Beta III	SS
.017 x .025, .018 x .025, .019 x .025					x	x
Optional wires						
.021 x .025					x	x

Archwire Stiffness Chart	Ultra/Light	Light	Medium	High
ADV Therm NiTi	x			
Black NiTi S/E		x		
NiTi S/E		x		
NiTi Tri-Force (multi-mod)	x anterior	x canine, bi's	x posterior	
NiTi Torqued Wire		x

FEATURES

- ◆ Anatomically Contoured
- ◆ Available in Loose, Direct Bond or Pre-welded
- ◆ Metal Injection Molded
- ◆ Superior Base Design for Stronger Bond
- ◆ Smooth, Rounded Edges For Patient Comfort
- ◆ Full Radius Low-Profile Design
- ◆ Available in .018 & .022 Slots

Stainless Steel Archwires

Bright Steel or Gold Tone

Intricate bends breaking best for detailing and finishing

Super high-luster polish for reduced friction
Made from high quality spring temper 304V stainless steel
Guaranteed less than 3 degrees torque on square and rectangular wires
Midline marked with FDA "white listed" ink for complete patient protection

Standard Form, Natural Form, or Euro Arch Bright Steel or Gold Tone

Standard Form is narrower in the anterior region, Natural Form is wider in the anterior region and reduces the need for time consuming arch form adjustments. Euroarch has rounded anterior and straightens in posterior.

Round Standard or Natural Form or Euro Form Available in: .012, .014, .016, .018, .020

Rectangular Standard or Natural Form or Euro Form

Available in: .016, x .016, .016 x .022, .017 x .025, .018 x .025, .019, x .025, .021 x .025

Nickel-Free Beta III CNA

Nickel-Free Titanium Archwire

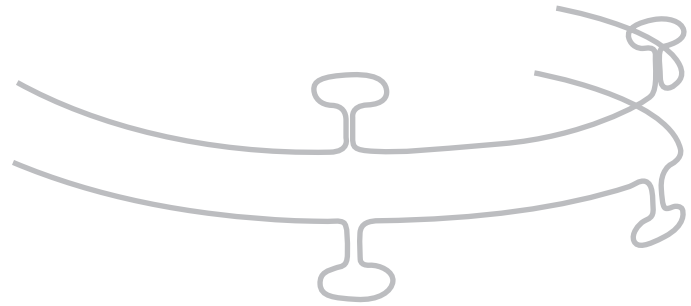

A Bendable, High Force, Low Deflection, Nickel-Free Titanium Archwire. BETA III is a titanium molybdenum alloy composed of 79% titanium, 11% molybdenum, 6% zirconium and 4% tin. While providing a moderate stiffness (approximately 42% of stainless steel) this wire can be deflected 100% more than stainless steel without permanent deformation. The BETA III alloy provides a perfect welding platform for the placement of stops or auxiliary loops.

Super Elastic

Dimpled Nickel Titanium Archwires

Natural long arch with a bright finish and an ink center-mark (black-upper, red-lower)

- Excellent choice for initial unscrambling
- Permanent midline helps anchor wire firmly in place
- Helps eliminate is slightly broader than the lower for easy identification and space requirements
- Dimple midline is available in all our archwire shapes and sizes. Upper dimple is slightly broader than lower for easy identification and to fit larger pace requirements needed for upper central's

Dimpled Flat Wires

Nickel Titanium (NiTi) CTA Intrusion Archwires

Nickel Titanium CTA Intrusion Archwires can be used for anterior intrusion, molar extrusion, distal molar tip back for posterior anchorage preparation, and Class II correction.

UPPER			LOWER		
Inches	Description	Item #	Inches	Description	Item #
.016 x .022	Upper Short	CTA-16X22US	.016 x .022	Upper Short	CTA-16X22LS
	Upper Long	CTA-16X22UL		Upper Long	CTA-16X22LL

	Upper Long	CTA-17X25UL		Upper Long	CTA-17X25LL

Use the Long (Upper and Lower) wires for non-extraction and/or long arches
Use the Short (Upper and Lower) wires for extraction and/or shorter arches

Black Nickel Titanium (NiTi) Dimpled Archwires

Black NiTi Dimpled Archwires feature a hard black, ultra smooth oxide surface. The black oxide surface treatment increases archwire integrity while reducing sliding friction by more than 30% compared to traditional nickel titanium. **10 per Pack**

Super Elastic Nickel Titanium (NiTi) Torqued Archwires

TORQUED			
Inches	Arch	Color Code	Item #
.017 x .025	28mm	Blue	TA-17X25B28
	34mm	Red	TA-17X25R34
	38mm	Green	TA-17X25G38
.019 x .025	28mm	Blue	TA-19X25B28
	34mm	Red	TA-19X25R34
	38mm	Green	TA-19X25G38

Features the same as the standard Nickel Titanium Archwires, while adding 20 degrees of torque in the anterior segment which introduces torque in the upper centrals and laterals. The lower torqued archwires allow the lower anteriors to be negatively torqued helping compensate for the rebound factor after the archwire is removed. These archwires should be installed in the upper arch with the identification marks facing occlusally.

Sure Bond One Step Bonding System

Saves time with accurate bonding always

FEATURES

- Excellent composite resin system for bonding Metal, Plastic and Ceramic brackets to etched enamel.
- This system does not require pre-mixing.
- Thick tacky composite resin eliminates bracket floatation.
- Achieve maximum bond strength in 5 minutes.
- Placement of archwires is possible 5 minutes after the bonding of last bracket.
- Fluoride releasing helps protect against potential decalcification.
- A strong self cure bond that can be de-bonded easily with one piece removal after orthodontic treatment.

Sure Bond Economy Kit Item # MK-999-9922

Components - Economy Kit

4 x 5gm One step bonding adhesive No: 565-014
1 x 16cc One step orthodontic primer No: 565-013
1 x 9cc One step etchant liquid No: 565-012
25pcs Bonding brushes 2¼" inch.
50 Sheets mixing pad 2.5 x 2.5 inch.

Note:

Application instruction manual is included with all bonding kits

Separate Re-Fill Components:

5gm One step bonding adhesive No: 565-014
16cc One step orthodontic primer No: 565-013
9cc One step etchant liquid No: 565-012

Components - Intro Kit

1 x 5gm One step bonding adhesive No: 565-014
1 x 8cc One step orthodontic primer No: 565-013
1 x 9cc One step etchant liquid No: 565-012
25pcs Bonding brushes 2¼" inch.

Sure Bond Light Activated Bonding System

FEATURES

- A uniquely formulated composite resin system for bonding Metal, Plastic and Ceramic brackets to etched enamel.
- The light cure bonding resin/composite system sets on demand and provides complete control to the practitioners.
- Thick tacky composite resin eliminates bracket floatation.
- Placement of archwires is possible immediately after full curing of brackets.
- A strong light cure bond that can be de-bonded easily with one piece removal after orthodontic treatment.
- Fluoride releasing helps protect against potential decalcification.

Standard Distal End Cutter, Safety Hold T.C.

The versatile and compact head provides easier access to difficult to reach area & help to minimize cheek impingement. Cuts wires close to the buccal tube and safety hold the distal end. Cuts all types of arch wires up to .021" x .025" (.55mm X .64mm).

MK-528

Long Handled Distal End Cutter, Safety Hold T.C.

The features slim extra long handle and compact head to ensure easy access to hard to reach area. Cuts wires close to the buccal tube and safety holds the distal end. Cuts all types of arch wires up to .021" x .025" (.55mm X .64mm).

MK-528L

Mini Distal End Cutter, Safety Hold T.C.

The smaller size and compact head provides easy access to difficult to reach area and help to minimize cheek impingement. Cuts wires close to the buccal tube and safety hold the distal end. Ideal for women orthodontists and dental assistants. Cuts all types of arch wires up to .021" x .025" (.55mm X .64mm).

MK-528M

Flush Cut Distal End Cutter, Safety Hold T.C. Rod Design

Flush Cut to end of the buccal tube eliminating the patient discomfort from arch wire protrusion.
For arch wires up to .021" x .025" (.55 x .64mm).

MK-529

Flush Cut Distal End Cutter, Safety Hold T.C. Spring Design

Flush Cut to end of the buccal tube eliminating the patient discomfort from arch wire protrusion
For arch wires up to .021 x .025" (.55 x .64mm).

MK-529S

Flush Cut Distal End Cutter, No Hold T.C. Slotted Design

The special design cuts flush and hold distal end. Cuts wires from .016" (.41 mm) to .021" X .025"(.55mm X .64mm).

MK-529R

Standard Ligature Cutter T.C.

This cutter has fine tips with compact head for easier access to difficult to reach areas. Cuts ligature wires, pins & elastics. Wires up to .012" (.30mm).

MK-525

Standard Ligature Cutter 15° Angled T.C.

Angled at 15° tips provides easy cut to difficult to reach areas. Cuts ligature wires, pins & elastics.
Wire up to .012" (.030mm).

MK-525A

Long Handled Ligature Cutter Slim T.C.

Mini compact sharp tips, slim long handle provides easy access to molar areas. Wires upto. 012" (.30mm)

MK-525L

Mini Ligature Cutter T.C.

The small head fine precision pointed tips specially designed for soft wires enable to cut wires into hard to reach areas inside the bracket slot effectively. Wires up to .012" (.30mm).

MK-525M

Lingual Ligature Cutter 50° Angled T.C.

Mini curved compact tips at 50° slim long handle provides easy access to molar and upper lingual areas
Ideal for upper lingual Wires cuts upto.012" (.30mm)

MK-525 UL

Lingual Ligature Cutter 60° Angled T.C.

Mini curved compact tips at 60° slim long handle provides easy access to molar and lower lingual areas.
Ideal for lower lingual Wires cuts upto.012" (.30mm).

MK-525LL

Hard Wire Cutter T.C.

Easily cuts all types of arch wires and retainers.
Wires from .012" (.30mm) to .021" X .025" (.053mm X.064mm).

MK-526

Hard Wire Cutter 15° Angled T.C.

Easily cuts arch wires or pin 15° angled tips provide greater visual access to the posterior areas. Wire cuts from .012" (.30mm) to .021" X .025" (.053mm X.064mm).

MK-526 A

Hard Wire Cutter Black Coated Titanium T.C.

Easily cuts arch wires and retainers. Wire cuts from .012" (.30mm) to .021" X .025" (.53mm X.64mm).

MK-527

Hard Wire Cutter Black Coated Titanium 15° Angled T.C.

Easily cuts arch wires or pin with 15° angled tips provide greater visual access to the posterior areas. Wire cuts from .012" (.30mm) to .021" X .025" (.53mm X.64mm).

MK-527A

Heavy Duty Wire Cutter T.C.

Ideal for laboratory use with comfortable vinyl grip hold and cuts all types of wires up to .030" (1mm)

MK-555

Supra Heavy Duty Cutter T.C.

This powerful instrument cuts up to 1.5mm wire with ease due to its triple action design. TC inserted tips ensure precision cutting and perfect tip alignment. Cuts from .014" (.35mm) to .060" (1.5mm).

MK-556

Weingart Utility Pliers Small "V" Type

Universal versatile small "V" shaped angular serrated beaks are firmly grip for placement and removal of any archwires up to .021" x .025" (.55mm X.64mm).

MK-515N

Weingart Utility Pliers Small "V" Type With T.C.

MK-515N T.C.

Weingart Utility Pliers

Small popular versatile serrated beaks utility plier for small hands. Wires up to .021" X .025" (.53mm X.64mm).

MK-515T

Weingart Utility Pliers With T.C.

MK-515T T.C.

Weingart Utility Pliers 60°

Small and slim precision serrated 60° angular beaks for an easy access to posterior or lingual areas. Wires up to .025" (.064mm).

MK-515L

Weingart Utility Pliers

Slim and long precision serrated 45° curved beaks are designed for easy placement and removal of arch wires. Convenient to reach molar and lingual areas Wires up to .025" (.064mm).

MK-515

Weingart Utility Pliers Micro

Delicate micro serrated tips hold soft archwires firmly. Convenient for lingual hard to reach areas. Wires up to .020" (.51mm).

MK-515M

How Utility Pliers 3mm Tips Straight

Utility pliers with serrated 3mm tips for easy placement and removal of all types of archeries. Wires Up to .022" x .028" (.56mm X .71mm).

MK-511

How Utility Pliers 3mm Tips Straight With T.C.

MK-511 T.C.

How Utility Pliers 3mm Tips Curved

Utility pliers 40° curved serrated tips for easy access to posterior, lingual and hard to reach areas. Wires up to .022" X .025" (.56mm X .64mm).

MK-512

How Utility Pliers 3mm Tips Curved With T.C.

MK-512 T.C.

Bird Beak Pliers Classic

The most popular and versatile plier for forming loops on all types of round archwires. Wires up to .028" (.71mm).

MK-514

Bird Beak Pliers Classic With T.C.

MK-514 T.C.

Bird Beak Pliers With Cutter T.C.

The most popular and versatile pliers with notch for non-slip forming loops on all types of round arch wires. Up to .028" (.71mm) and cuts wires up to .020" (.51mm).

MK-514C

Bird Beak Pliers Long

Longer beaks for making precision loops in light round and square. Wire up to .028" (.71mm).

MK-514L

Bird Beak Pliers Long With T.C.

MK-514L T.C.

Light Wire Pliers with 2 Grooves

The most popular wire bending pliers. For bend and loop in arch wires up to .025" (.64mm). The grooves assures firm grip of holding wires. Flat beak is grooved for holding round wire at 1mm and 2mm from tip.

MK-585

Light Wire Optical Pliers 1 Groove

Excellent for forming spiral closing loops and arch positive wires up to .022" x .025" (.53mm X 0.64mm).,

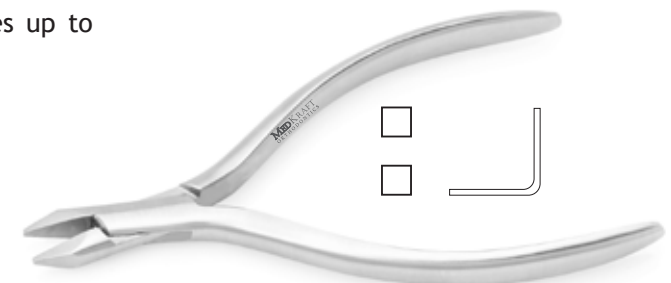

MK-585F

Adams Pliers

Precise Square beaks bend right angle and appliances wires up to .040" (1mm).

MK-524

Adams pliers With T.C.

MK-524 T.C.

Tweed Arch Forming Pliers .70mm

Designed for torquing and bending square or rectangular wires. The .70mm blades are designed to be parallel at .020" opening. Use on wires up to .021" x .025" (.55 x .64mm).

MK-538S

Tweed Arch Forming Pliers .70mm With T.C.

MK-538S T.C.

Tweed Arch Forming Pliers 1mm

Designed for torquing and bending square or rectangular wires. The 1mm blades are designed to be parallel at .020" opening. Use on wires up to .021" x .025" (.55 x .64mm).

MK-538

Tweed Arch Forming Pliers 1mm With T.C.

MK-538 T.C.

Nance Loop Pliers

Precise loops forms in 4 steps 3mm, 4mm, 5mm and 6mm. Slot at the back helps in closing loops. Serrated one side for non- slippage. Wires up to .022" (.56mm).

MK-532

Nance Loop Pliers With T.C.

MK-532 T.C.

Tweed Loop Forming Pliers

Excellent loop forming pliers with .045", .060"and .075" diameters in arch wires up to. 022" X .025" (.53mm X.64mm).

MK-533

Omega Tweed Loop T.C.

Serrated concave/convex tips for making accurate omega loops. Diameters of .045", .060" and .070" . wires up to .022" x .028" (.56mm X .71.mm)

MK-989 T.C.

3-Prong Pliers

Precision aligned tips are gently rounded for consistent contouring and bending without damaging the arch wire, adjust clasps and retainers. One-piece construction of the double tip ensures superior strength and accuracy.

Wires up to .030" (.76mm).

MK-513M

Niti 3-Prong Pliers Small

Excellent 3-Prong for effective bending and forming of niti wires up to .016" (.41mm).

MK-513S

Jarabak Pliers

Half round serrated flat beak s ideal for bending and forming or light wire .Three grooves assure accurate bending and closing of loops. Bend wires up to .021" X .025" (.53mm X .64mm).

MK-516

Jarabak Pliers With T.C.

MK-516 T.C.

Jarabak Pliers With Cutter T.C.

Half round serrated beak is ideal for bending and forming or light wires. Three grooves assure accurate bending and closing of loops. Wires upto.021" x .025" (.53mm X .64mm). Cuts wires up to.020" (0.51mm)

MK-737 T.C.

Tweed Loop Pliers

Concave/convex beaks make small loops, distal stops and omega loops on arch wires. Wires up to .021" x .025" (.55 x .64mm).

MK-990

Occulist Optical Pliers (Small)

Designed to form loops on round and rectangular wires. Up to .020" (.54mm).

MK-521

Occulist Optical Pliers (Small) With T.C.

MK-521 T.C.

Occulist Optical Pliers (Large)

Ideal for bending round and rectangular wires. Up to .022" (.56mm).

MK-522

Johnson Band Contouring Pliers

Small precision matched concave and convex tips for the contouring of bands and crowns.

MK-740

Band Crimping Pliers

The instrument is designed to crimp and reform band with comfort and accuracy.

MK-536

Band Slitter Pliers T.C.

Fine pointed tips cuts upper & lower bands for easy placement and reduce patient discomforts.

MK-898

Posterior Band Remover Short

The plastic pad rests on the occlusal surface of the molar which places the removing tip in the perfect position to remove bands. Replacement pads are available.

MK-517

Posterior Band Remover Short With T.C.

MK-517 T.C.

Posterior Band Remover Long

The plastic pad rests on the occlusal surface of the molar which places the removing tip in the perfect position to catch the gingival edge of the band. Slim and longer beaks effectively remove molar bands.

MK-517L

CE

Direct Bond Bracket Remover Straight

Remove bracket easily by holding the face of the canine bracket in a horizontal position and slightly applying pressure by torquing or turning in a clockwise motion or anti clockwise motion.

MK-741

Direct Bond Bracket Remover Straight

Debond all types of canine brackets and attachments at ease and safe.

MK-739

Direct Bond Bracket Remover 40° Angled

Designed at 40° angle allows us easier access of difficult to reach posterior brackets and anterior bonded attachments.

MK-519

Direct Bond Bracket Remover 80° Angled Lingual

Specially designed for easy removal of lingual brackets and attachments.

MK-741A

CE

Adhesive Removing Pliers T.C.

Sharpe metal tip remove adhesive after deboning. Pad rests on occlusal surface of the tooth for any discomfort to the patient.

MK-518

Replacement Pads (Set of 2)

MK-518 P

Crimpable Hook Pliers Straight

The slotted tip holds the hook for positive firm crimping and locked.

MK-750

Crimpable Hook Pliers Angled

Angled tips are for easy access hard to reach areas for a positive firm crimping on hooks.

MK-750A

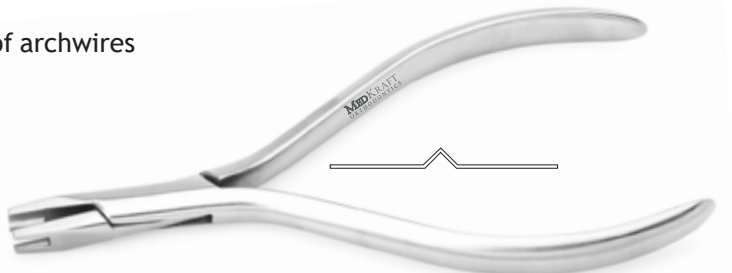

Special Stop V-Bend Pliers

Designed to provide an accurate 1mm v stop on all types of archwires and NITI up to .022" X .025" (.53mm X .64mm).

MK-742

Special Stop V-Bend Pliers With T.C.

MK-742 T.C.

CE

Step Plier ½ mm T.C.

Strong and sturdy plier is excellent for up or down ½ mm step on archwires incremental with intervals. Wires up to .022" X .028" (.56mm X .71mm)

MK-899

Step Plier ¾ mm T.C.

Strong and sturdy plier is excellent for up or down ¾ mm step on archwires incremental with intervals. Wires up to .022" X .028" (.56mm X .71mm)

MK-899M

Step Plier 1 mm T.C.

Strong and sturdy plier is excellent for up or down 1 mm step on archwires incremental with intervals. Wires up to .022" X .028" (.56mm X .71mm)

MK-899L

Cinch Back Niti Tie Back Distal Pliers

Fine serrated tips on edge of this instrument hold the wire securely while bending the NITI arch wire at 90° distal to the buccal tube. Wires up to .025" (.64mm)

MK-914

CE

Tube Crimping Pliers With Groove

Grooved tips are designed for crimping stops and tubes on wires.

MK-537

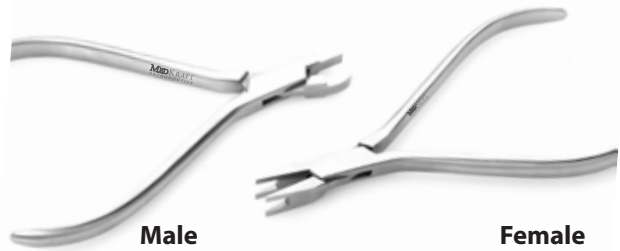

Torquing Set of Pliers

A set of 2 pliers for making an accurate torque on arch wires. up to .025" (.64 mm)

Set of 2 MK-750 Male MK-750A Female MK-750B

Torquing Set of Pliers with T.C.

Set of 2 MK-750 T.C. Male MK-750A T.C. Female MK-750B T.C.

De La Rosa Arch Contouring Pliers

Precision matched concave and convex tips for smooth contouring of light wire loops. Contours and forms arches without torquing. Wires up to .021x.025" (.055mm X.064mm).

MK-541

De La Rosa Arch Contouring Pliers With Grooves

Same design as MK-541 with three grooves measuring .018" (.46mm) .022" (.56mm) and .025" (.64mm) for contouring of light wires loops. Contours and forms arch without torquing. Wires up to .021 x .025 (.055mm x .064mm).

MK-582

CE

Hollow Chop

Excellent for forming NITI arch wires. Gentle curvature for contouring all types of wires up to .025" (0.64mm).

MK-875

Ligature Forming Pliers

Performs ligature wires accurately.

MK-530

Reynolds Pliers

Ideal for contouring bands and crowns in lingual, molar areas.

MK-896

Kim Pliers With Cutter T.C.

Three steps forming and bending multiple loops edgewise arch wires .diameter 1.2mm, 1.8mm and 2.2mm and cuts all types of wires up to .022" (.053mm).

MK-895

CE

Young Pliers

Heavy duty with diameter 2mm, 3mm and 4mm and a pair of closing grooves at the back to make different small loops for multi-loops edgewise arch wires. Up to .045".

MK-850

Lingual Arch Forming Pliers

Forms Double and Triple-back bend in .030" (.76mm) and .036" (.90mm) wires fit in lingual sheaths.

MK-919

Easy Ligature Placer

Delicate fine tips allow easy access and placement of elastomerics.

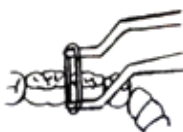

MK-508

Elastic Separating Pliers

Fine curved beaks for easy access to difficult areas. Grooved tips assure positive hold for positioning elastomeric effectively and safely.

MK-509

CE

Elastic Separating Pliers With Adjustable Screw

Same function of MK-509S with an adjustable screw for control, accuracy and placement of elastics.

MK-509S

Coon Style Ligature Tying Pliers

A precision hand crafted self locking ligature tying pliers with precise slotted beaks for the holding wires to ensure the ease of applying and tying ligature wires.

MK-510

Mathieu Smaha Straight

Mosquito style fine serrated tips but strong enough for inserting arch wires. Excellent for placing elastomers.

MK-702

Mathieu Smaha Curved

Mosquito style fine curved tips but strong enough for inserting arch wires & excellent for placing elastomeric on lingual brackets.

MK-702C

CE

Mathieu Ligature Pliers Narrow

Precision serrated narrow tips. Placement of ligating wires and elastomeric ties. Ratchet locking assures a non-slip grip.

MK-502

Mathieu Ligature Pliers Standard

Precision serrated wide tips. Placement of ligating wires and elastomeric ties. Ratchet locking assures a non-slip grip.

MK-503

Mathieu Ligature Pliers Standard T.C.

Precision serrated carbide inserted tips. Placement of ligating wires and elastomeric ties. Ratchet locking assures a non-slip grip.

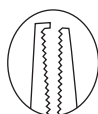

MK-503 T.C

Mathieu Ligature Pliers Hook

Features a hook designed for ease and exactness of placing of elastomerics. Locking handle provide non-slip grip.

MK-505

CE

Mathieu Ligature Pliers With Notch

The notch at the tip allows firm hold and for placement of elastics. Locking handle provides non-slip grip.

MK-504

Mathieu Ligature Plier (Lobster)

Mathieu style ligating pliers excellent for placement for elastics ligatures. Locking handle provides non slip grip.

MK-701

Mathieu Narrow Tip Double Spring

Precision serrated tips. Placement of ligating wires and elastomeric ties. Ratchet locking assure a non-slip grip and double spring provides an easy application

MK-502D

Mathieu Wide Tip Double Spring T.C.

Precision serrated carbide inserted tips. Placement of ligating wires and elastomeric ties. Ratchet locking assures a non-slip grip and double spring provides an easy application.

MK-503D T.C

CE

Mosquito Forceps straight

Ligature hemostat with micro serrated tips for multi utility. action make this an Excellent instrument for tying ligatures.

MK-543

Mosquito Forceps Curved

Ligature hemostat with micro Serrated tips for multi utility. Locking action make this an Excellent instrument For tying ligatures. Effective for lingual use.

MK-544

Mosquito Forceps Hook

Designed for ease and sureness in placing elastic ligatures. and locking handle assure a non-slip grip.

MK-542

Mosquito Forceps Notch

Ligature hemostat with notch serrated tip allows for easy Placement of elastics. Locking handle assure a non-slip grip.

Important suggestions for maintenance and sterilization of instruments

(Supplied in non sterile packaging).

Cleaning and rinsing!

immediately after use instruments must be rinsed in warm water to remove all blood and mucosa that remains on the instruments.

1. Dont place in the same container instruments made of different metals: ex. stainless steel and comon steel, chromed or nickel plated, brass or copper in the same wash cycle.
- 2.Observe all suggestions from the manufacture for the cleaning and washing of instruments, most manufacturer recommend that the wash cycle doesn't exceed ten mins.
3. All instruments must be completely opened and submerse in cleaning solution.
4. Dry all instruments.
5. After having washed instruments in ultrasonic, never open and close instruments without first placing a drop of lubricant in the opening and closure. Use only specific surgical lubricant. don't use industrial lubricants.
6. If it's not possible to wash instruments in an ultrasonic special care must be taken when washing instruments. Use a plastic brush with rigid bristles, don't use metal bristles. Rinse under running water, making sure all instruments parts are opened so that all residue is washed away.
7. We recommend distilled water for rinsing of instruments.
8. We recommend dry heat sterilization for orthodontic pliers and cutters.

Sterilization in autoclave!

1. After having carefully washed dried and oiled instruments place instruments that can be opened in the open position, put these instruments in sterilization packets and place in appropriate trays.
2. Be careful not to over load autoclave. When an autoclave is too full it's possible that proper sterilization has not taken place.
3. After the sterilizing cycle has taken place, follow manufacturer's suggestions for drying cycle.

Cold Sterlization!

When using a solution for sterilizing instruments careful attention must made that the solution kills specific bacteria and virus, many solutions have no effect on bacteria or virus when in the presence of blood; also many solution are very corrosive on the instruments, most solutions recommended a soak time of 10 hrs.

Because of the long soak time the chemical action can damage the instrument.

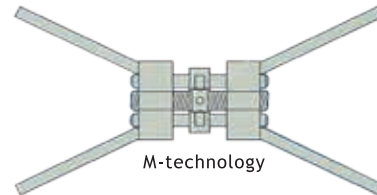

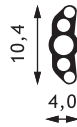

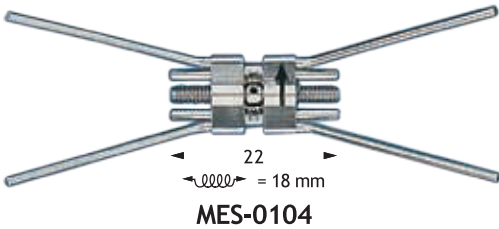

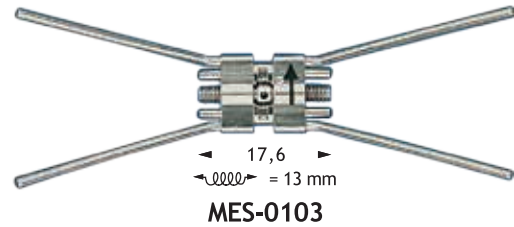

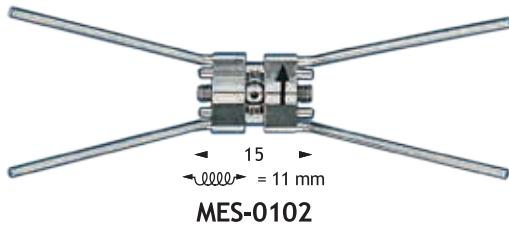

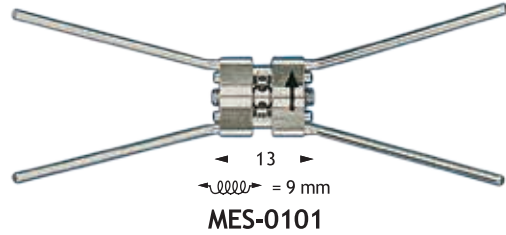

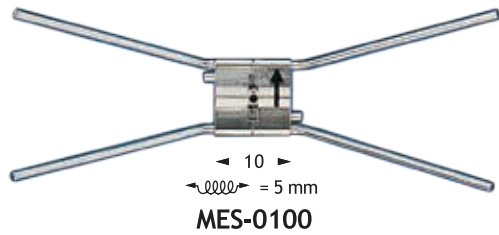

Reduce when possible soak time; where indicated use a corrosion inhibitor.

for cold sterilization we recommend procide 28 germicidal solution.

When proper care is taken these stainless steel instruments can last for many years.

Palatal Suture Expansion Screws

Laser-welded retention arms. Stable guiding pins and thread spindle for utmost reliability and transmission of forces.
M-Technology (not in 1114/10) guarantees maximum bending and torsion strength when expanded.
